HUYNH QUOC HUY

Web Developer

Dob:	31/10/2000
Gender:	Male
Phone:	0946091206
Email:	hhuy31102000@gmail.com
Website:	https://github.com/cassle123 https://www.linkedin.com/in/huy3110
Address:	District 7, Ho Chi Minh City

OBJECTIVE

After graduating from Ho Chi Minh City University of Technology - HUTECH with a degree in Information Technology, I am committed to continually enhancing my expertise. I believe in combining formal education with independent research to achieve a comprehensive understanding and practical application of knowledge. To me, becoming an IT expert goes beyond merely acquiring knowledge; it involves effectively applying it in real-world scenarios.

EDUCATION

2018 - 2022	**HO CHI MINH CITY UNIVERSITY OF TECHNOLOGY (HUTECH)**
	HO CHI MINH, VIET NAM
	BACHELOR'S OF INFORMATION TECHNOLOGY

TECHNICAL SKILLS

Programming Languages	JavaScript, .NET/C#, SQL
Frameworks, Platform & Library	• ASP.NET Webforms, ASP.NET Core WebAPI, ReactJS • Boostrap 5, Restfull API, JSON, Syncfusion Library (SpreadSheet), Axios • IIS Windows Server
Databases	SQL Sever, MySQL
Version Control	Github, JIRA
Knowledge	• Strong grasp of OOP principles and Design Patterns (Singleton, Strategy, Decorator, Factory Method, Template Method), with proficiency in dependency injection. • Deep understanding ReactJS, React Hooks, Lifecycle Methods, State & Props, Routing, JSX and ES6 JavaScript. • Proficient in ASP.NET technologies including WebForms and WebAPI. • Experienced in Restful API implementation, HTTP protocols, and Database Store Query. • Skilled in translating image templates into design layouts, and capable of developing animations and crafting responsive UI designs. • Collaborative team player with strong organizational skills, adept at coordinating and prioritizing tasks effectively.

WORK EXPERIENCE

02/2023 - 04/2024	**INFOASIA SOFTWARE** *Fullstack .Net Developer* My experience at the company has not only allowed me to improve my Front-end skills but has also equipped me with additional knowledge and expertise, including Back-End and SQL. Furthermore, I have gained valuable insights into website deployment and customer task management through SAP B1. Additionally, learning from my colleagues has been invaluable. Despite my primary role as a Front-end Developer, I am adept at effectively handling additional requests related to Back-End or SQL and successfully completing all assigned tasks.
11/2022 - 01/2023	**SNA VIETNAM COMPANY** *SYSTEM ENGINEER (PROBATION)* I explored operating systems, networking, RAID, and virtualization technologies, deepening my understanding of Windows Server and Linux. Onsite visits to customers broadened my project exposure, fostering growth in technical and interpersonal skills, particularly in client-facing troubleshooting.
05/2022 - 10/2022	**FPT INFORMATION SYSTEM JOINT STOCK COMPANY** *SAP ABAP DEVLOPER* During my time at the unit, I've gained insights into work processes, improved time management, and deepened my expertise in SAP ABAP technology. Contributing to projects for esteemed companies like Coteccons Construction, KIM TIN GROUP, and Dat Xanh Group has broadened my knowledge and enhanced my project management skills in diverse team settings.

PROJECTS

MY PORTFOLIO

(05/2023 - NOW)

Link product	https://cassle123.github.io/MyPortfolio
Description project	This is the product that I want to develop for creating a my personal introduction website.
Your team size	1
Your position in project	Front-end Developer
Your responsibility in project	• Building and developer this website using ReactJS and responsive mobile. • Configure and deploy web in Github Pages.
Technology description	ReactJS, React Hook, React-Router-V6, Prop-types, Vite, Github Pages, VScode.

WEBSITE OA (INFOASIA SOFTWARE)

(02/2023 - 04/2024)

Name of customer	Uniwin, Buwon
Description project	The website is built based on clients' needs for using SAP B1 but with a desire for enhanced user-friendliness. Therefore, the project is developed to meet these

	requirements. Additionally, it includes the development of various new features such as Barcode scanning, Calendar, Excel-addin, etc.
Your team size	5
Your position in project	Fullstack .Net Developer
Your responsibility in project	• Collaborate effectively with team Developers to implement new functions and ensure compliance with customer project requirements. • Revamp the website's appearance as part of the project participation. • Ensure responsiveness across the entire website. • Developed an Admin interface facilitating user page management, featuring functional stickers, ticketing for requirement generation, along with Inventory History, Journal Entries, Salary, Sales Order, Calendar with Notes, Work Order Scheduling, Move Batch, Car & Room Manager, Sticker Manager, and support for Human Resource functions. • Enhanced Analysis Builder Excel Add-in with Syncfusion integration, custom formulas, SQL data compatibility via API, and introduced new features including saving files to server, reading files from server, sheet refreshing,... • Designed and implemented APIs to support Excel add-ins and optimize data processing time. • Wrote optimized SQL queries to retrieve data efficiently.
Technology description	ASP.NET Webforms - WebAPI . NET 6/C#, Boostrap/JQuery/JavaScript, Crystal Report, SAP B1, SQL Server,...

ECC (INFOASIA SOFTWARE)

(09/2023 - 04/2024)

Name of customer	Uniwin, Buwon
Description project	This project involves integrating E-invoice between ECC and MISA, utilizing data from ECC to generate electronic invoices through MISA.
Your team size	5
Your position in project	Front-end Developer
Your responsibility in project	• Support Back-End Developers to implement new functions and ensure compliance with customer project requirements. • Integrating Syncfusion Excel Add-in functionality into the project. • Developing both the project system interface and its responsive website. • Implementing the return functionality. • Designing the UI for the Balance Sheet function.
Technology description	ASP.NET/C#, Boostrap/JQuery, Crystal Report, SQL Server,...

APP MOBILE OA(INFOASIA SOFTWARE)

(11/2023 - 04/2024)

Name of customer	INFOASIA SOFTWARE
Description project	This project is being developed with the aim of reaching customers with multi-platform needs. The project has already been published on CH Play as a first trial version. Although this is the initial trial version, it includes some key basic functions similar to those on the official website.
Your team size	5
Your position in project	Front-end Developer

Your responsibility in project	• Conceptualize, build, and prototype interfaces and application interfaces for official applications, with a focus on cross-platform compatibility. • Learn and implement the MVVM model for a demo app and the MVC model for official applications. • Develop functional tickets synchronized with website functionality via API, with app notifications for ticket submissions. • Design UI functional domains facilitating database connectivity or utilizing demo databases. • Implement a List View function for loading data and incorporating accompanying function buttons. • Enable file upload functionality to the API and local file saving on devices.
Technology description	Blazor-MAUI/C#, Boostrap/JQuery, Crystal Report, SQL Server,...
